Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☒ Claim(s) 1-7 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 06 October 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☒ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

Specification

The disclosure is objected to because of the following informalities: The disclosure appear a translation from a foreign language and includes some informalities inherent therewith. For example: the specification lacks the various headings and it is improper for the specification to reference the claims.

The entire disclosure should be reviewed to ensure it complies with current U.S. standards. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a translation into English from a foreign document and are replete with grammatical and idiomatic errors. Some examples are as follows: claim 1, line 2, the "fixing means" requires a function; claim 1, line 3, the "*reduced* diameter" [italic added] requires a reference to determine what it is reduced relative to; claim 1, line 7, there is no antecedent basis for "the body" and claims 6 and 7 are indefinite because they are not further limiting to the anchor in fact as written they are completely separate from the anchor and may be subject to restriction. The claims were examined as best understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mark (US 4,983,082). Mark discloses an expandable anchor comprising an anchor element (2) with an expansion zone (13) and an expansion sleeve (5) of hardened steel having expansion tongues (11) connected to the sleeve along straight predetermined bending lines (see Fig 2) in order to reduce the force required to bend the tongues. The bent stamped component is a product-by-process limitation where it is only the final produce which is considered for patent and there is discloses a spacer sleeve (3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mattner (US 5,816,760) in view of Mark. In the embodiment of Fig. 4, Mattner discloses an expandable anchor comprising an anchor element (20) with an expansion zone

having flat sides (32) and an expansion sleeve (5) of hardened steel having expansion tongues (6) connected to the sleeve a straight predetermined bending lines. The bent stamped component is a product-by-process limitation where it is only the final produce which is considered for patent and there is discloses a spacer sleeve (8 in Fig. 1). In Mattner the shape of the bend lines is not disclosed. However, Marks discloses a similar expandable anchor having straight bend lines (see Fig. 2). At the time the invention was made, it would have been obvious for one of ordinary skill in the art to provide the anchor of Mattner with straight bend lines as disclosed in Mark for the purpose of reducing the force required to bend the expandable sections as discussed in Mark. Mattner further discloses a key-engagement surface (11) which inherently would receive a setting tool. The examiner takes notice as to the specifics claimed of the tool.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
